

Force Feed Loader

3000 Series

Year-Round Material Loading

LeeBoy's versatile 3000 Force Feed Loader is a year-round workhorse, picking up soil, snow, milling or other windrowed material for fast, low-cost material loading. The climate controlled operator's platform and cab enhance safety and provide superior visibility of the front pick-up feeder and the rear discharge conveyor.

The 3000 Force Feed Loader excels at continuous high-capacity material loading and offers safe single or double lane operation in roadway applications.

Multi-Purpose Moldboard

The tapered moldboard (see cover photo) allows for efficient pickup of a variety of materials before they move to the feeder paddles that carry the material to the 28 foot belt conveyor. The multi-purpose moldboard features augers to push material to the feeder paddles. This increases efficiency for operations such as snow removal.

Swivel Conveyor Attachment

The swivel conveyor attachment rotates 180 degrees for discharge of materials to either side of the 3000 Force Feed Loader. This feature allows the receiving truck to travel next to the loader in the same direction as it receives material from the swivel conveyor.
